Standard: 19-1/2" wide coverage and 1-1/2" high interlocking rib.

Custom: 11-1/2" wide up to 19-1/2" wide coverage.

Standard: Pre-notched both ends for faster installation.

Custom: Striations for added rigidity.

Custom: Clip Relief for added rigidity.

NOTE: Some custom options are not mutually compatible and may require additional lead time.

ABSeam Panel Standard Profile (ABScC)

Why Fluropon®?

For over 50 years, panels using Sherwin-Williams' (formerly Valspar) Fluropon® coatings (made with 70% Kynar®500/Hylar®5000 resins) have helped protect commercial, industrial, and residential buildings around the world. This high-performance fluoropolymer (PVDF) resin, with its extraordinary capability to retain color and gloss, keeps coated metal looking vibrant and appealing for decades to come.

ABSeam Panel Textured Profile (ABSTcc)

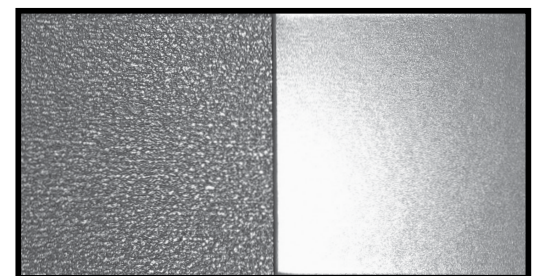

Why Choose Textured?

The textured panels continue to be very popular in residential applications.

Homeowners like it because the unique textured surface redirects sunlight for less glare than smooth panels. Plus the textured panels are less prone to "oil canning" which makes for a more attractive roof.

Contractors like it because the texture provides more grip during installation than smooth panels.

Because the textured coating is baked into the metal coil at the factory, our textured colors carry the same 40-year film integrity warranty as our smooth colors.
