

1800-SERIES ENTRY DOOR (1852/72 & 1853/73 Models)

Recommended Use

☒	Agriculture
☐	Commercial
☐	Metal

Economical capped edge utility door

With its sturdy capped edge panel, 1-5/8" thickness and multiple skin choices-from 30-gauge steel to fiberglass - our 1800-Series doors offer a wide range of economical options for agriculture environments.

FEATURES

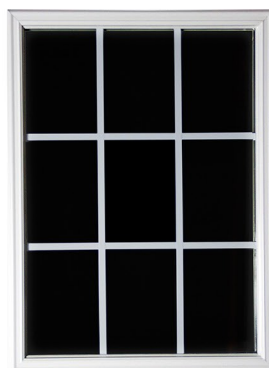

- 30-gauge steel, aluminum or fiberglass panel skins for various conditions, such as moderate moisture or livestock containment.
- Prefinished white panel with mill (1853/73) or white (1852/72) frame for a low maintenance door that doesn't require painting.
- Options include window lites specifically made for this door thickness.
- The 1800-Series capped edge panel helps keep the door both durable and economical.
- Features a 1-5/8" thick panel works well with window lites, most common locksets/deadbolts and other available factory-installed options.
- Equipped with 4" x 4" stainless steel NRP hinges.
- The 1800-Series doors have pile weatherstrip on the jambs to help minimize heat loss/gain.
- Comes standard in either 2868, 3068, 4068, or 6068 sizes.
- All doors are pre-hung and offer universal swing.
